HCM Market Insights Q1 2023

M&A Q1 2023 In Review

- Global M&A activity fell Q1 2023 with total deal value coming in at just under \$1 Trillion, down 17% from the same period a year ago and down 10% from Q4 2022. Total deal count remained steady, with an estimated 10,625 transactions completed, down 7% from the previous quarter and slightly up from Q1 2022.
- In North America, 4,492 deals were completed with a combined enterprise value of \$503B. M&A mirrored global trends with a 5% drop in total deal value and 10% decline in deal count. Despite the recent decline, activity in Q1 outpaced M&A average deal count and total deal value from the years 2017 to 2019.
- PE backed exits represented 6.3% of all Q1 deals, down from 7.9% in 2022 and a high of 10.5% in 2018. In tandem, add-on acquisitions as a percent of total PE acquisitions increased once again to an all-time high of 75%. As PE firms hold their portfolio companies, they continue to pursue add-ons for existing portfolio companies.
- Overall deal count has remained steady as buyers are taking advantage of somewhat tempered valuations. Median EV/EBITDA was 7.9x in Q1 down from 9.1x in 2022.

North American M&A Outlook

- Despite the macroeconomic headwinds, the 2023 M&A market remains dynamic.
 Although valuations moderated in Q1 M&A is expected to accelerate in H2 2023. This increase in momentum is driven by sellers recalibrating expectations and recognizing the value of bringing on a value-added partner, well-capitalized companies pursuing core business acquisitions, and private equity groups deploying high levels of capital.
- In the H2 2023 we expect a more stable financing landscape and increased bandwidth in leveraged finance markets. As a result, the need for larger equity checks in private equity deals is expected to decrease, ultimately leading to an improvement in the market. This is particularly relevant given that deals have become progressively smaller over the past year and easier to finance.
- Founder-owned private companies are being acquired by private equity firms at an
 unprecedented rate as a proportion of the overall deal flow, a trend that is projected to
 persist. Founder-run companies have proven to be valuable add-ons to existing
 portfolio companies, particularly if they can provide immediate value beyond that of a
 typical accretion event. Given the shortage of platform companies on the market,
 private equity groups are expected to maintain their focus on bolstering their current
 portfolio platforms through add-ons.
- The volatility in the VC markets has caused a notable decrease in new funds and increased reluctance in funding later-stage companies. Furthermore, due to the current inaccessibility of the IPO market and liquidity requirements, M&A activity is expected to increase for this segment of the market later in the year.

Select HCM Insights

- Advancement in digital super intelligence, or Artificial Intelligence (AI) continues to make waves in the headlines. Its profound impact within the workplace is reshaping how employers approach workplace challenges. The C-Suite is trying to keep pace with the changes and grappling with the implications and opportunities presented by AI in driving employment cost efficiency, accuracy, and innovation.
 - A March 2023 report from Goldman Sachs highlighted the situation by revealing that automation of certain tasks could disrupt a staggering 300 million jobs worldwide. However, according to former Google CEO, Eric Schmidt, fears that advances in AI will leave many jobless may be overstated, instead AI will cause "job conflagration" resulting in a continued worker shortage. 1
 - The impending launch of workplace software tools, including <u>Microsoft's Copilot</u>, promises to revolutionize productivity by leveraging natural language processing to automate tasks and enhance data accessibility within Microsoft Office apps. With its cutting-edge capabilities, and customization for each Office app, this innovative tool is poised to significantly improve efficiency and serve as a personal assistant for users.
- The use of Al in recruitment is projected to surge in the coming years. A promising prospect is that Al will empower recruiters to embrace a candidate-centric approach, drive efficiency, and mitigate recruitment bias. Furthermore, Al will equip recruiting experts to leverage data gathered from talent markets, helping them evaluate candidates.
- The labor market in the US has begun to slow down, although historically speaking it continues to demonstrate considerable strength. Reports from various Fed banks suggest that the labor market is gradually moving towards a more sustainable pace, easing the severe hiring strains experienced by employers over the past couple of years. This, in turn should lead to a reduction in wage growth. Despite these trends inflation remains above the 2% mark indicating the Fed is likely to implement a moderate rate hike in the coming months.
- Trade worker employment demand is expected to persist nationally. With an average age of 55 yrs. nearly 41% of the construction industry is expected to retire before 2031, further increasing talent scarcity. Additionally, employment demand across leisure and hospitality, education, health, and government is expected to remain strong. ²
- Despite tech layoff news and recession fears, the technology staffing industry is expected to remain one of the most resilient staffing sectors in 2023. According to a recent SIA survey the IT staffing sector has witnessed steady growth with a median revenue increase of 4% year over year in February, following a 9% rise in December. However, the survey also revealed larger companies participating in the study fared worse than smaller ones resulting in a 4% year-over-year decline in aggregate revenue. There has been a notable decrease in new IT staffing orders over the last three months, indicating a slowdown. To add to that, 42% of respondents reported their companies have laid off temporary staff on assignment. It's evident that IT staffing firms are approaching the first quarter of 2023 with more conservatism and caution. Nevertheless, the demand for Cloud, Digital, Data Analytics, UI/UX, and Product and Project Management roles remains robust, indicating that the overall demand for skilled professionals in the industry is still high.³

The Rise of Digitalization and Automation within Staffing and Recruiting

By: Neal England, Managing Director

In recent years, many recruitment and staffing companies have begun transforming toward greater efficiency with the increased adoption of digitalization and automation tools. With the emergence of "true AI" tools like ChatGPT and Bart, powered by large language models, the competition to do more with less is accelerating and the efficiency gap is widening. In this fast-changing, new environment for staffing, management teams must be thoroughly conversant with digital tools and emerging technology to stay ahead and relevant. "For companies slow to adapt, the threat is not that they will be disrupted but rather they will fall irreparably behind the competition." – Brian Delle Donne, President of Talent Tech Labs

Today, streamlined tech approaches are available for almost every traditional staffing process that previously relied on manual efforts and paper documentation, enabling faster and more focused decision-making on core competencies. It remains to be seen at this stage how the human element can be fully displaced digitally within the "people business." Afterall, the essence of qualifying talent beyond a skills assessment relies heavily on judgement calls, character evaluation, and emotional intelligence determined by trained professionals. With some tech, companies can leverage and enhance their current workforce by using streamlined approaches to engage and screen more candidates, analyze and make sense of complex data, automate scheduling, and much more, resulting in improved hiring and workforce planning.

According to Bullhorn's annual global recruitment survey, companies with the highest revenue gains were twice as likely to have digitized their data and heavily leveraged automation compared to those with the greatest revenue losses. While 77% of staffing firms have started implementing digital transformation strategies, many are still in the early stages. Only 30% reported using self-service technologies like chatbots to streamline operations and engage candidates, and a mere 17% heavily leverage automation throughout their business.

For many management teams fully embracing digitalization can be confusing and intimidating. However, taking the first step does not need to be a daunting task. The key is to start slow by consulting with experts, designing a clear roadmap, and incrementally implementing and advancing the company's systems and automation tools. It is most important to evaluate if these tools will provide a positive return on investment; moreover, these processes and programs must be seamlessly integrated to maximize their effectiveness and real-time reporting capabilities.

With regard to mergers and acquisitions, we are beginning to see a shift in the staffing industry as technology-driven platforms are increasingly acquiring traditional brick-and-mortar staffing companies. This trend is enabling companies to integrate and streamline less sophisticated staffing and recruiting firms, resulting in a greater ability to put employees to work in a more efficient and effective manner. Conversely, we are also witnessing some traditional staffing and recruiting providers acquiring advanced technology platforms to elevate their own offerings and internal operations, fostering greater sophistication within their services. The acquisition of Bluecrew by EmployBridge in late 2022 serves as an excellent example of this trend. By incorporating Bluecrew's digital workforce management platform, EmployBridge is poised to broaden its capabilities significantly and the synergistic blend of scale and technology-driven approach will propel EmployBridge's strategic vision forward.

Staffing Services Valuation Scorecard Summary

Enterprise Value / EBITDA

20 Minutes

12-Page Report

Our continued desire to help owners get it right has led us to create the Investment Grade Assessment (IGA). We've handpicked 90 of the most important questions we've heard HCM buyers and investors ask owners to help owners benchmark the likelihood their company could receive an institutional investment.

Founders has expanded the assessment to include sector specific versions with tailored questions that are weighted based on relevant industry KPIs.

This is a highly efficient tool that provides exceptional value in the short 20 minutes it takes to complete.

Here's a brief video discussing it further: https://vimeo.com/647794938

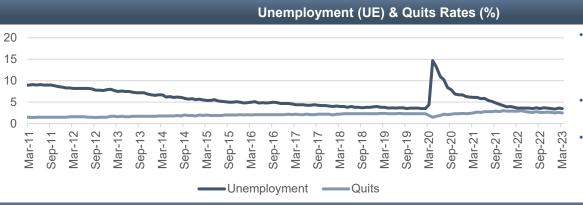

"I just took the assessment. There are some great insights that serve as areas I need to focus on with the business. So, some great food for thought and guidance and well worth the time of taking it. Plan to take it once a year to make sure we are trending in the right direction!" **Justin Emond, CEO/Founder of Third and Grove**

US Labor Force and Macroeconomic Indicators

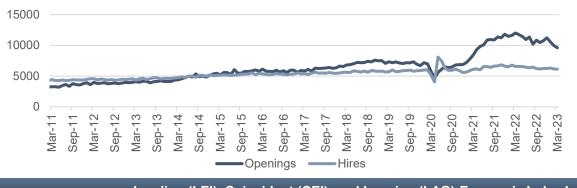

U.S. Gross Domestic Product (GDP) Growth Rate 40.0% 20.0% 0.0% -20.0% -40.0% 2013 2014 2015 2016 2017 2018 2019 2022 2023 2011 2012 2020 2021 Real GDP, Percent Change from Previous Period

- GDP grew at an annualized rate of 1.1% in the quarter, missing estimates of 2% growth. Despite this being the third consecutive quarter of growth, growth slowed form 2.6% in Q4 2022.
- Even with persistent inflation consumer spending accelerated to a 3.7% growth rate, up from 1.0% in Q4.

- The unemployment rate fell to 3.5% in March down from 3.6% in February but remained flat from the previous quarter.
- The labor force participation rate edged up to 62.6%.
- Total quits has declined over the last twelve months, falling from a high of 3.0% in April 2022, down to 2.5% in March.

Job Openings and Hires (Thousands)

- The labor market showed signs of cooling off this quarter as Job Openings fell for three consecutive months, down to the lowest level since May 2021.
- Hires remained relatively flat over the quarter but have fallen by nearly 10% since an all-time high in February of last year.

Leading (LEI), Coincident (CEI), and Lagging (LAG) Economic Index Indicators

The Conference Board publishes LEI, CEI, and LAG indexes designed to signal potential peaks and troughs in the business cycle for the <u>US economy</u>.

- The LEI fell to its lowest level since November 2020, the twelfth consecutive monthly decline.
- The CEI increased in March, marking a 0.8% increase over the last six-months.
- The LAG decreased in March to 118.3, the first decline in nearly 18 months.
- The Conference Board indicators point towards a moderate macroeconomic slowdown starting in mid-2023.

HCM Transactions*

Notable Transactions across HCM

Salo

Korn Ferry (NYS: KFY) acquired Salo in February 2023 for an undisclosed amount. Salo, a Minneapolis based business, is a leading provider of finance, accounting, and HR interim talent with a focus on the healthcare industry. The acquisition will strengthen Korn Ferry's organizational consulting portfolio and follows 2 acquisitons in 2022.

On February 17, 2023, White Wolf Capital acquired Clover Leaf Solutions. The acquisiton is the second add-on acquisition in the past four months for White Wolf's portfolio company, CEIS. Clover Leaf provides consulting and staffing services for Department of Energy clients, expanding CEIS's capabilites. CEIS acquired Rayne Staffing in December 2022.

INSPYR Solutions, an A&M Capital Partners platfrom, acquired ProTask in February, the first acquisiton since TekPartners and Genuent merged to form INSPYR in 2022. ProTask is a digital staffing and professional services firm servicing financial service, healthcare, and fintech end markets. The acquisiton allows INSPYR to expand their solutions in the Mid-Atlantic region.

Proman acquired PeopleShare in March, the company's fifth acquistion since the start of 2022. The acquisiton expands Proman's U.S. footprint to include 18 states. In the transaction, Trivest Partners exited its investment in PeopleShare after providing capital in 2015. PeopleShare is a temporary staffing firm serving the light industrial, clerical, and financial sectors.
